

Skilled Nursing & Rehab Care

Come meet our highly qualified Rehab Team! They have a combined 100 years of experience.

Three Top Reasons to Trust Creekside

- 1 Customized Care**
Each patient receives an initial assessment and a customized therapy program is developed to address specific areas of need and personal preferences. We provide our services on an in- or outpatient basis.
- 2 Unique Care**
Creekside offers a wide array of specialized therapies, including the area's only VitalStim for swallowing difficulties; cognitive therapies to address memory loss; neurorehab to help residents and outpatients recover from nervous system injury; orthopedic therapy to improve mobility; and functional conditioning for cardiac rehabilitation.
- 3 Follow-up Care**
Care doesn't end when the resident or outpatient leaves our center. We can accompany them to doctor visits to help ensure seamless communication with physicians and their team, so recovery can continue. We also offer Safety Home Inspection services to reduce the danger of falls and other safety hazards in the home.
